It would be great to get these into the docs! (If they are there, I haven't found them. Seems like they should be on the Keyboard page.)

**PHASER PATRON**

Kinda offtopic, but I'm a huge fan of this offline documentation reader for OSX called Dash. Some very [nice person](#) made a browsable docset for Phaser. Highly recommended.

It doesn't have the keyboard constants in it, but I have an issue open for that as of now. ( =
